profile

web communication for business internationalisation

A strategy and method for
effectively approaching
foreign markets by using
social media.

DAVID

Project Management

GABRIELE

Marketing and
Communications

our value added?

Communicating complex realities,
simply. In distant countries.

Our social media approach can grow your business on
markets you haven't even considered yet.

GIOVANNI

Development

Vision

Enhancing the perception that Italian businesses have of social media and web tools.

Mission

Planning, designing and creating in a digital environment in favour of the real economy.

the web is the most modern
and efficient means of being
identified as a possible partner
in countries that maintain a
high growth rate.

The logo for Weevo, featuring a stylized lowercase 'i' with a dot above it, followed by the word 'Weevo' in a serif font.

the hub of your business communications

Strategy

Based on your objectives, we plan the best ad hoc digital communications strategy for the target country

Channels

From a simple landing page, to an enterprise or e-commerce website, and even social network accounts. We manage the channels, spread the messages and interact with the requests of potential customers

with the right tools,
thanks to web marketing,
distances change
paradigm and the world
comes closer.

Weevo

We rely on Drupal, an enterprise class content management system that is versatile, flexible and open source, but not vertical.

It is particularly recommended for enterprise projects due to its stability, reliability and scalability, as well as its high degree of security.

Drupal™

some of the tools we wanted
did not exist

So we designed and created them ourselves.

Partner

4 dry figures

Sometimes, they speak louder than words.

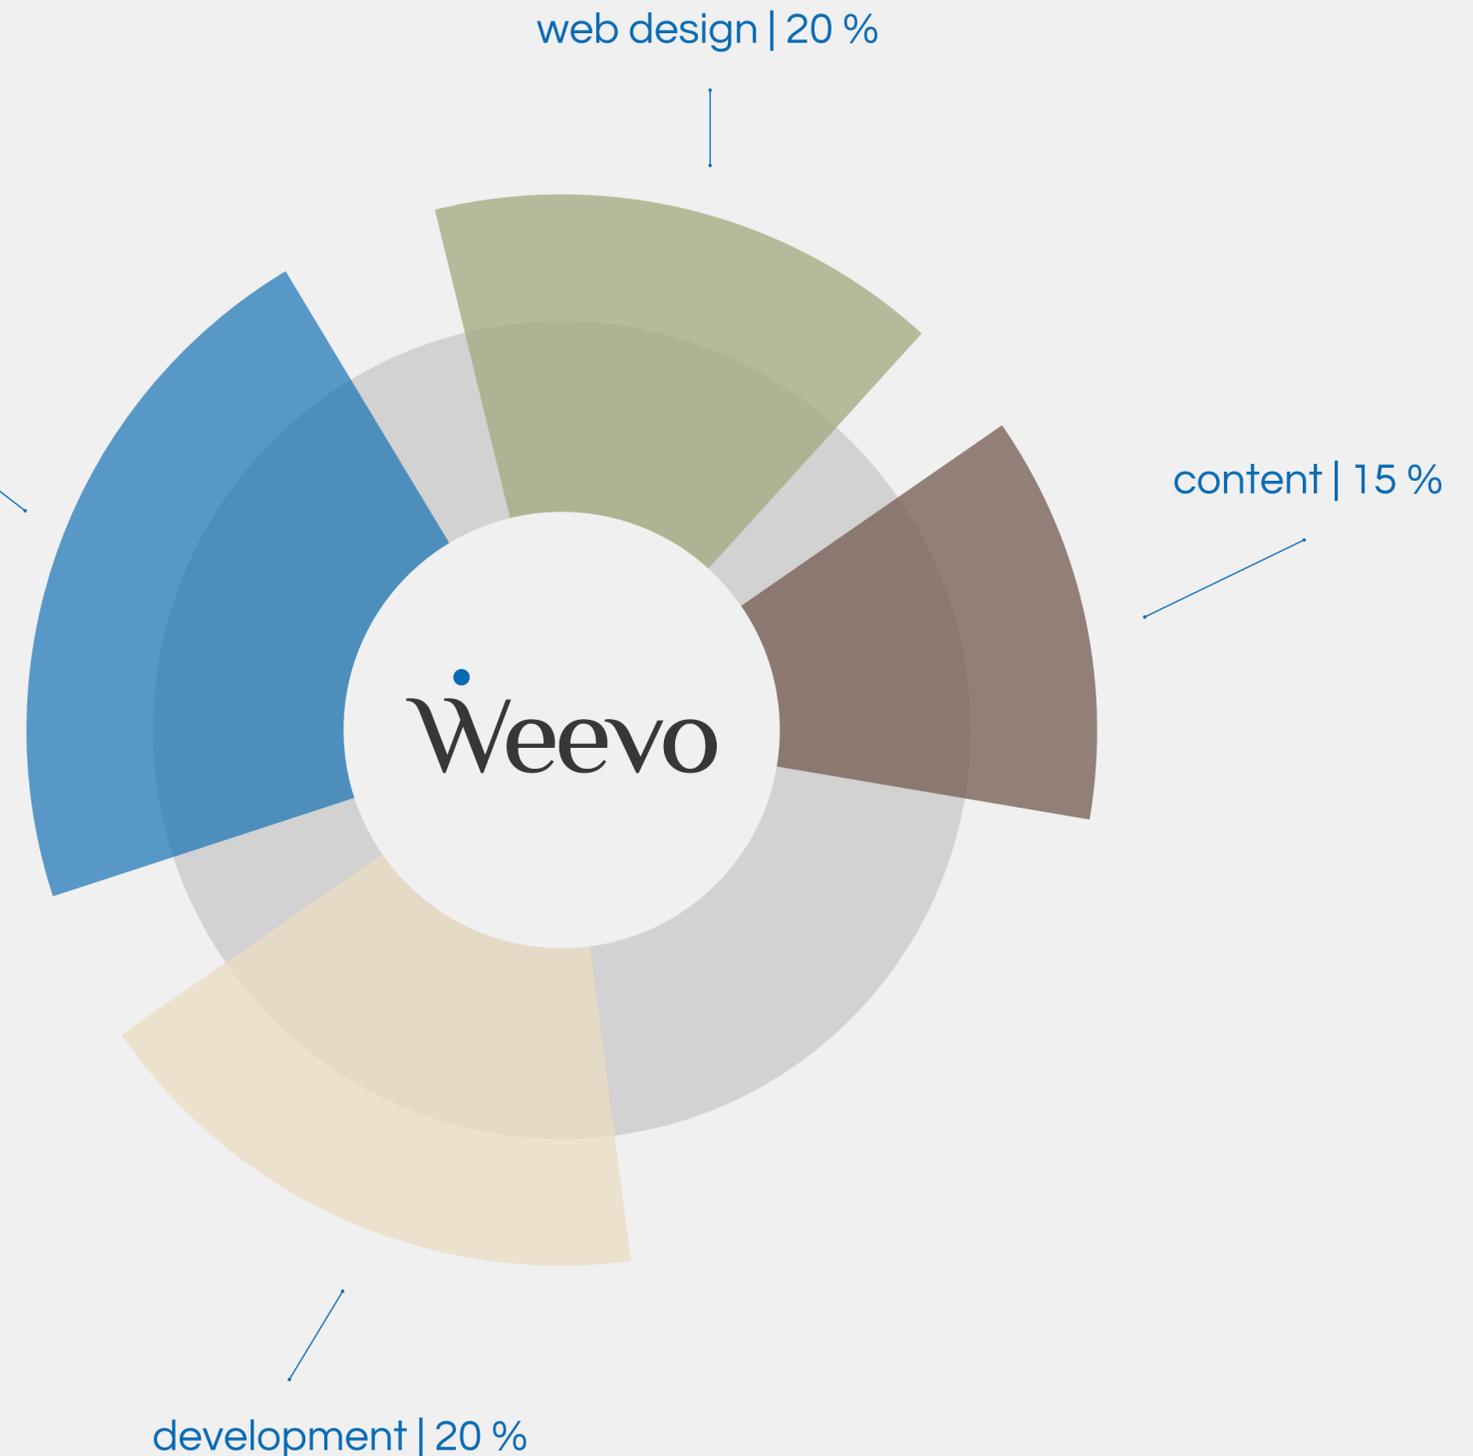

We have been around for four years, maybe not enough to talk about our "history", but enough to project a positive growth trend based on concrete figures obtained with market consensus.
